

The Green Spine

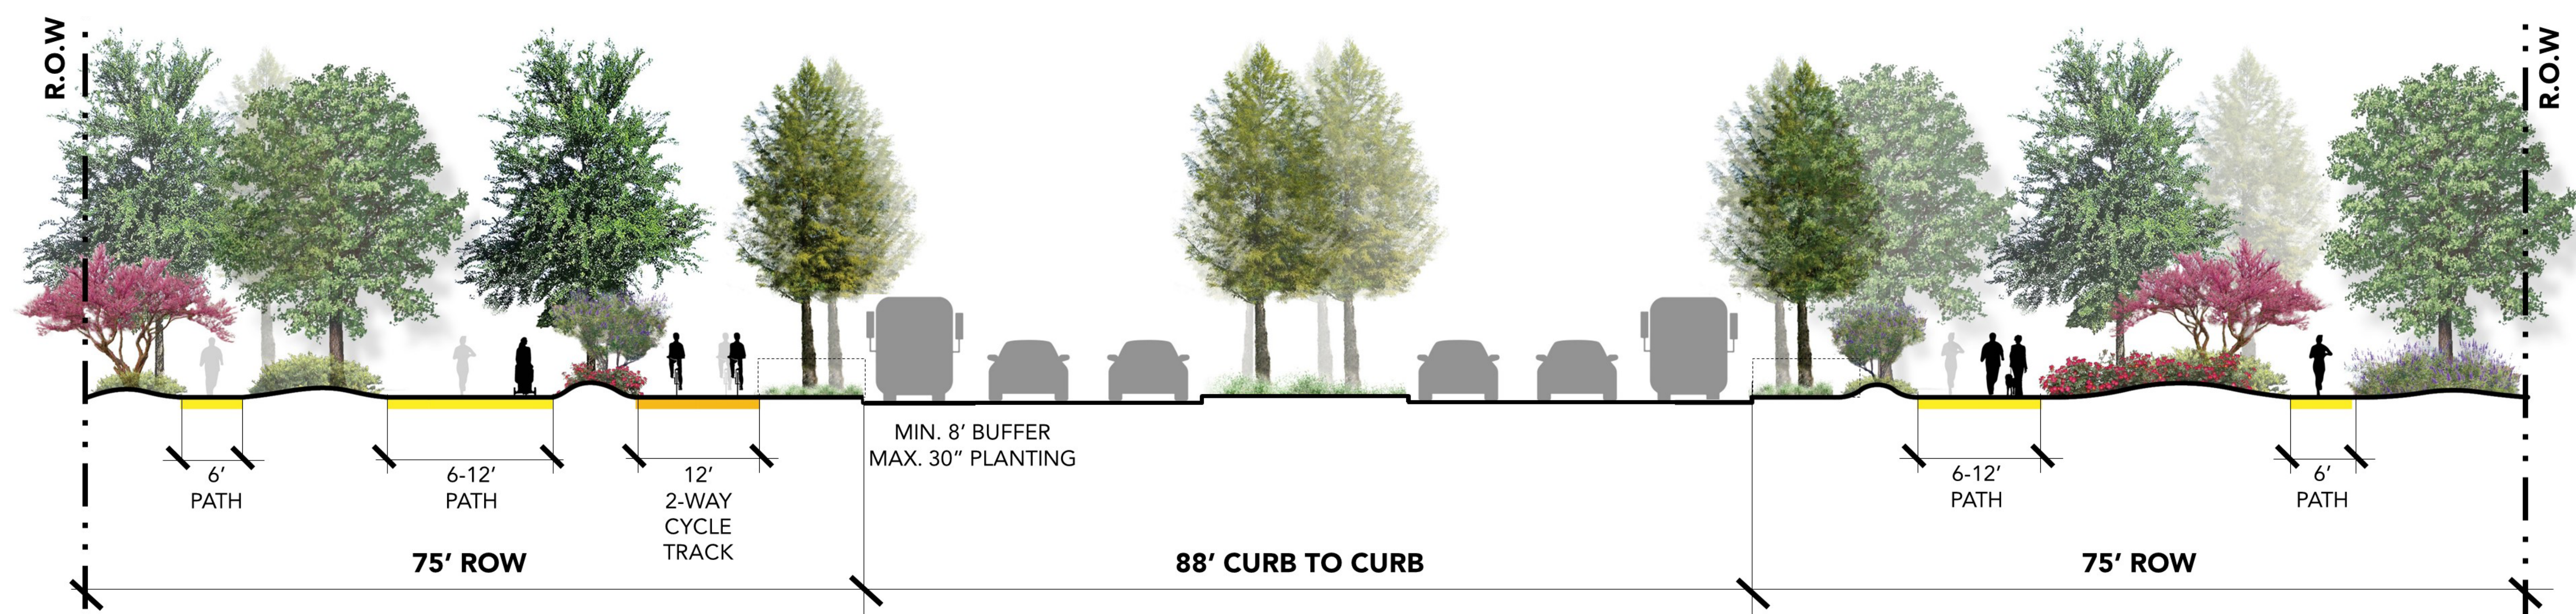

Take the Survey to Learn More!

The Green Spine is a unique green corridor that allows for the **safe, comfortable passage of automobiles, transit, bicyclists and pedestrians**. The design aims to promote “one health”, incorporating biking, walking and jogging facilities for physical health, spaces for gathering and shared activities to promote social health, places for respite and contemplation to support mental health, and significant greening to improve the area’s environmental health and reduce urban heat.
